Largest Independent Producer
Occidental has been producing in Oman for over 30 years, where we have steadily increased production and reserves. Today we are the largest independent oil producer operating in the country, with more than 6 million gross acres.

One Billion Barrels
Occidental’s Oman operations reached a significant milestone in 2017 with the production of our one-billionth gross barrel of oil, including condensate, from all of our blocks.
Oman Operations
In Oman, Occidental’s major operations are located in northern Oman, primarily in Block 62 and at Safah Field in Block 9, and in south-central Oman in Block 53 at Mukhaizna Field, the largest producing oil field in the country. We operate a gas plant in the Maradi Huraymah Field, part of Block 62.

Decades of Growth
Occidental has exploration contracts for Blocks 30, 51 and 65 in northern Oman and Block 72 in central Oman. The blocks are adjacent to current operations and leverage existing infrastructure. Occidental’s northern Oman exploration program is among the most successful in company history.

EOR Leader
With more than 40 years of experience, Occidental is a global leader in enhanced oil recovery (EOR). We built one of the world’s largest mechanical vapor compression stations at Mukhaizna Field for steamflooding EOR.

Omanization Commitment
One of the largest private employers in the country, Occidental has an ongoing, comprehensive jobs program to recruit and train Omani citizens. We are committed to placing Omani citizens in positions from entry level to executive management. Over 92 percent of our employees in Oman, including 89 percent of leadership positions, are Omani nationals.

Economic Development
To promote small and medium enterprise (SME) development, Occidental provides training and marketing support to Omani businesses for sustainable growth, capacity building and expansion. Occidental also supports the Sultanate’s In-Country Value (ICV) program, sponsored by the Ministry of Oil and Gas, promoting Omani-based manufacturing and service providers.

Top Safety Performance
Safety is an integral part of Occidental’s company culture. We take particular pride in Occidental’s safety record, which is exemplary not only in the oil and gas and chemicals industries, but compared to any industry sector.

Advanced Drilling
Our proprietary Oxy Drilling Dynamics technology is helping drive down costs by reducing drilling days, preventing tool failures and improving precision landing.

Technology Transfer
Occidental operates state-of-the-art Virtual Reality technology at Mukhaizna and Oman North Fields to accelerate training of new employees and develop experienced employees.

Supporting Local Contractors
Occidental supports Omani vendors through its Local Community Contractors program, an initiative that shares best practices and provides assistance on sustainable resource management, health, environment and safety management, and skills development.

Vocational Education
Occidental supports a vocational training program that offers Omani students the chance to learn how to become electricians and welders — skills that are in high demand in the oil field.

Partner of Choice®
Occidental is committed to providing safe, healthy and secure workplaces; protecting the environment; maintaining high ethical standards; upholding and promoting human rights; and respecting cultural norms and values, everywhere we operate.

Low-Carbon Leadership
With decades of experience in large-scale CO₂ transportation, use and storage for EOR, we are applying our carbon management expertise to advance low-carbon initiatives that will sustainably enhance our business. Occidental is focused on decreasing our total carbon impact and helping others achieve the same goal.

Pathway to Net-Zero
Occidental expanded its vision for a low-carbon future by leveraging its carbon management and storage expertise to achieve net-zero emissions with our operations before 2040 and an ambition to achieve net-zero emissions associated with the use of our products by 2050.
