LARGEST INDEPENDENT PRODUCER
Oxy has been producing in Oman for over 30 years, where we have steadily increased production and reserves. Today we are the largest independent oil producer operating in the country, with more than 6 million gross acres (more than 24,000 gross square kilometers). Oxy's major operations are located in northern Oman, primarily in Safah and Wadi Latham Fields in Block 9, Khamilah Field in Block 27, and in Block 62, where we operate the Muradi Huraymah gas plant, and in south-central Oman in Block 53 at Mukhaizna Field, the largest producing oil field in the country.
DECADES OF GROWTH
Oxy’s Oman exploration program continues to add significant reserves after many years of success through the application of advancing technology, an in-depth geological knowledge gained through experience that has resulted in many new field discoveries, and a persistent approach to exploration. Our northern Oman exploration program is among the most successful in company history.

EXPLORATION OPPORTUNITIES
We have exploration contracts for Blocks 30, 51 and 65 in northern Oman and Block 72 in central Oman, as well as mature exploration and production in Blocks 9, 27 and 62 in northern Oman. The newer blocks are adjacent to our current operations and leverage existing infrastructure.

OMANIZATION COMMITMENT
One of the largest private employers in the country, Oxy has an ongoing, comprehensive jobs program to recruit and train Omani citizens. We are committed to placing Omani citizens in positions from entry level to executive management. Over 94 percent of our employees in Oman, including 90 percent of leadership positions, are Omani nationals.

One Billion Barrels
Oxy's Oman operations reached a significant milestone in 2017 with the production of our one-billionth gross barrel of oil, including condensate, from all of our blocks.

Top Safety Performance
Safety is an integral part of Oxy’s company culture. We take particular pride in Oxy’s safety record, which is exemplary not only in the oil and gas and chemicals industries, but compared to any industry sector.

EOR Leader
With more than 40 years of experience, Oxy is a global leader in enhanced oil recovery (EOR). We built one of the world's largest mechanical vapor compression stations at Mukhaizna Field for steamflooding EOR.

Economic Development
To promote small and medium enterprise (SME) development, Oxy provides training and marketing support to Omani businesses for sustainable growth, capacity building and expansion. Oxy also supports the Sultanate’s In-Country Value (ICV) program, sponsored by the Ministry of Energy and Minerals, promoting Oman-based manufacturing and service providers.

Advanced Drilling
Our proprietary Oxy Drilling Dynamics technology is helping drive down costs by reducing drilling days, preventing tool failures and improving precision landing.

Technology Transfer
Oxy operates state-of-the-art Virtual Reality technology at Mukhaizna and Oman North Fields to accelerate training of new employees and develop experienced employees.

Low-Carbon Leadership
With decades of experience in large-scale transportation, use and storage for EOR, we are applying our carbon management expertise to advance low-carbon initiatives that will sustainably enhance our business. Oxy is focused on decreasing our total carbon footprint and helping others achieve the same goal.

Pathway to Net Zero
Oxy, leveraging its carbon management and storage expertise, expanded its vision for a low-carbon future by setting a target to achieve net-zero emissions with our operations before 2040 and an ambition to achieve net-zero emissions associated with the use of our products before 2050.

Partner of Choice®
Oxy is committed to operating responsibly; providing safe, healthy and secure workplaces; protecting the environment; maintaining high ethical standards; upholding and promoting human rights; benefiting our stakeholders; and respecting cultural norms and values, everywhere we operate.

Supporting Local Contractors
Oxy supports Omani vendors through its Local Community Contractors program, an initiative that shares best practices and provides assistance on sustainable resource management, health, environment and safety management, and skills development.

Vocational Education
Oxy supports a vocational training program that offers Omani students the chance to learn how to become electricians and welders—skills that are in high demand in the oil field.
