NO. 1 IN THE DJ BASIN

Oxy is the largest producer of oil and natural gas in the DJ Basin and largest leaseholder in Colorado. Through its subsidiaries, Oxy has operated in the DJ Basin for more than 30 years. Our employees live in more than 80 communities along Colorado’s Front Range, and we recognize the importance of working collaboratively with landowners, regulatory agencies and government officials.
Powder River Leadership
Oxy's history in the Powder River Basin dates back two decades. Oxy was the first to discover the Turner formation of the Southern Powder River Basin, an acreage position with stacked-oil potential.

Zero Routine Flaring Initiative Member
Oxy was the first U.S. oil and gas company to endorse the World Bank’s “Zero Routine Flaring by 2030” initiative to reduce greenhouse gas (GHG) emissions. Oxy has achieved zero routine flaring in our DJ Basin operations. Our support of the program is part of the company’s global commitment to reduce GHG emissions in our operations and more efficiently use valuable methane resources.

Technology and Data Analytics
Industry-leading engineering and the applied use of technology and data analytics are improving efficiency, reducing costs and driving performance, positioning Oxy for long-term success. Our proprietary Oxy Drilling Dynamics technology is helping drive down costs by reducing drilling days, preventing tool failures and improving precision landing.

Tankless Operations
Oxy’s innovative surface design in the DJ Basin uses pipelines instead of trucks to transport oil to a central processing facility, eliminating the need for oil storage tanks near wells. This technology decreases our environmental footprint and reduces emissions, dust, noise and truck traffic.

Conserving Water and Reducing Impacts
Our “Water-On-Demand” system delivers water for hydraulic fracturing to well sites in the DJ Basin through a pipeline system, which reduces truck traffic, impact to roads, noise and emissions. In many cases, this water is recycled.

Top Safety Performance
Safety is an integral part of Oxy’s company culture. We take particular pride in Oxy’s safety record, which is exemplary not only in the oil and gas and chemicals industries, but compared to any industry sector.

Real-Time Monitoring
Our 24-hour Integrated Operations Center provides real-time monitoring and remote operation capabilities for many of our DJ Basin wells, water tanks and pipeline system pressures.

Low-Carbon Leadership
With decades of experience in large-scale CO₂ transportation, use and storage for EOR, we are applying our carbon management expertise to advance low-carbon initiatives that will sustainably enhance our business. Oxy is focused on decreasing our total carbon footprint and helping others achieve the same goal.

Pathway to Net Zero
Oxy, leveraging its carbon management and storage expertise, expanded its vision for a low-carbon future by setting a target to achieve net-zero emissions with our operations before 2040 and an ambition to achieve net-zero emissions associated with the use of our products before 2050.

Oxy Low Carbon Ventures
Our subsidiary Oxy Low Carbon Ventures (OLCV) is developing carbon capture, utilization and storage projects to remove human-made CO₂ from the air to create lower carbon oil and other less carbon-intensive products. OLCV is participating in a joint study to assess the viability and design of a commercial-scale carbon-capture facility at the Holcim Portland Cement Plant in Florence, Colorado.

Partner of Choice®
Oxy is committed to operating responsibly; providing safe, healthy and secure workplaces; protecting the environment; maintaining high ethical standards; upholding and promoting human rights; benefiting our stakeholders; and respecting cultural norms and values, everywhere we operate.

Community Dialogue
Oxy employees who participate in the Advocate and Ambassadors program meet with stakeholders about our industry and operations. These conversations provide opportunities to communicate the facts and benefits of our operations to the Colorado economy, and to address questions from residents.

Educational Programming
Oxy partners with nonprofit organizations to ensure students across the Rockies have access to educational programming in science, technology, engineering, math and arts. Our employee volunteers lead these efforts.
