PERMIAN BASIN LEADERSHIP

Oxy is a leading producer and one of the largest acreage holders in the Permian Basin, with assets in southeast New Mexico concentrated in Eddy and Lea Counties. Oxy actively supports community organizations and first responders in New Mexico, and has a strong track record of collaborating with environmental groups and regulatory agencies.
CO₂ EOR LEADER
With 50 years of experience, Oxy is the largest injector of carbon dioxide for enhanced oil recovery (CO₂ EOR) in the Permian Basin and among the largest globally. CO₂ EOR can increase ultimate oil recovery by 10 to 25 percent, while safely and securely storing CO₂ in the pore space once occupied by the oil.

Unique Permian Portfolio
Oxy's combined Permian Basin portfolio of unconventional and conventional acreage differentiates us from our competitors. The key elements of our onshore strategy are to leverage our subsurface technical skills, unconventional shale development expertise, and CO₂ EOR position and capability.

Oxy Low Carbon Ventures
Our subsidiary Oxy Low Carbon Ventures is developing carbon capture, utilization and storage technologies to remove human-made CO₂ from the air for use in lower carbon oil production operations and to help create other less carbon-intensive products. We promote practical solutions industries can use to decarbonize—including CO₂ sequestration and carbon management advisory services.

Permian Takeaway
Oxy's midstream and marketing segment supports our upstream operations in the Permian Basin, allowing us to operate an integrated business from point of production to point of sale.

Pathway to Net Zero
Oxy's climate goals are to achieve net-zero greenhouse gas (GHG) emissions in our operations and energy use before 2040, with an ambition to do so before 2035, and net-zero emissions from our total carbon inventory, including the use of our products, with an ambition to do so before 2050.

Reducing GHG Emissions
Efficient capture and use of natural gas are key elements of Oxy's net-zero strategy. Oxy was the first U.S. oil and gas company to endorse the World Bank’s “Zero Routine Flaring by 2030” initiative. We were also the first major U.S. producer in the Permian Basin to join the Oil and Gas Methane Partnership 2.0, a Climate and Clean Air Coalition initiative led by the United Nations Environment Programme, as well as the Methane Guiding Principles.

CARBON STORAGE
Oxy is committed to transparency on carbon storage in our EOR operations. We received the first two Monitoring, Reporting and Verification (MRV) plans approved by the U.S. Environmental Protection Agency for our CO₂ EOR operations in Hobbs, NM, and Denver City, TX. We also have an MRV for our Gaines County, TX, operations.

Strong Safety Performance
Safety is an integral part of Oxy’s company culture. We take particular pride in Oxy’s safety record, which is exemplary not only in the oil and gas and chemical industries, but compared to most other industry sectors.

Logistics and Maintenance Hub
Located outside Carlsbad, NM, Aventine is the first integrated logistics- and maintenance hub in the Permian Basin, bringing facilities for sand, drilling services and equipment, and cement together in one facility. The hub’s central location has increased transportation efficiency and reduced heavy-haul traffic, eliminating more than 4 million miles (more than 6.4 million kilometers) of truck traffic since operations began.

Technology and Data Analytics
Industry-leading engineering and the applied use of technology and data analytics are improving efficiency, reducing costs and driving performance. Our proprietary Oxy Drilling Dynamics technology is helping drive down costs by reducing drilling days, preventing tool failures and improving precision landing.

Environmental Stewardship
Oxy is an inaugural partner in the Pecos Watershed Conservation Initiative, a proactive, landscape-based approach to management of Permian Basin species and habitats. Oxy has also been recognized by the U.S. Bureau of Land Management and theRestore New Mexico program for habitat restoration on the Todd Lower San Andres Unit in the Pecos Watershed.

Partner of Choice®
Oxy is committed to operating responsibly; providing safe, healthy and secure workplaces; protecting the environment; maintaining high ethical standards; upholding and promoting human rights; benefiting our stakeholders; and respecting cultural norms and values, everywhere we operate.
