TEXAS FAST FACTS

HEADQUARTERED IN TEXAS

Oxy is proud to be a major employer and contributor to the Texas economy and its vibrant communities. Texas is home to the majority of our employees, and our largest asset base of integrated plants and fields.

PERMIAN BASIN LEADERSHIP

Oxy is a leading producer and one of the largest acreage holders in the Permian Basin, with assets concentrated in West Texas and southeast New Mexico.
Unique Permian Portfolio
Oxy’s combined Permian Basin portfolio of unconventional and conventional acreage differentiates us from our competitors. The key elements of our onshore strategy are to leverage our subsurface technical skills, unconventional shale development expertise and CO₂ EOR position and capability.

Permian Takeaway
Oxy’s midstream and marketing segment supports our upstream operations in the Permian Basin, allowing us to operate an integrated business from point of production to point of sale.

OxyChem
OxyChem has a top-tier position both domestically and globally in all the products that it manufactures and markets. OxyChem has seven plants in Texas, located in Houston, Ingleside and Dallas.

Strong Safety Performance
Safety is an integral part of Oxy’s company culture. We take particular pride in Oxy’s safety record, which is exemplary not only in the oil and gas and chemical industries, but compared to most other industry sectors.

Training Excellence
Our Midland Technical Training Center provides employees and contractors a real-world training environment, driving operational excellence, collaboration and safe work practices.

Oxy Low Carbon Ventures
Our subsidiary Oxy Low Carbon Ventures is developing carbon capture, utilization and storage technologies to remove human-made CO₂ from the air for use in lower-carbon oil production operations and to help create other less carbon-intensive products. We promote practical solutions industries can use to decarbonize—including CO₂ sequestration and carbon management advisory services.

Low-Carbon Leadership
With decades of experience in large-scale CO₂ transportation, use and storage for EOR, we are applying our carbon management expertise to advance low-carbon initiatives that we believe will sustainably enhance our business. Oxy is focused on decreasing our total carbon footprint and helping others achieve the same goal.

Pathway to Net Zero
Oxy’s climate goals are to achieve net-zero greenhouse gas (GHG) emissions in our operations and energy use before 2040, with an ambition to do so before 2035, and net-zero emissions from our total carbon inventory, including the use of our products, with an ambition to do so before 2050.

Environmental Stewardship
Oxy is an inaugural partner in the Pecos Watershed Conservation Initiative, a proactive, landscape-based approach to management of Permian Basin species and habitats.

Reducing GHG Emissions
Efficient capture and use of natural gas are key elements of Oxy’s net-zero strategy. Oxy was the first U.S. oil and gas company to endorse the World Bank’s “Zero Routine Flaring by 2030” initiative. We were also the first major U.S. producer in the Permian Basin to join the Oil and Gas Methane Partnership 2.0, a Climate and Clean Air Coalition initiative led by the United Nations Environment Programme, as well as the Methane Guiding Principles.

Technology and Data Analytics
Industry-leading engineering and the applied use of technology and data analytics are improving efficiency, reducing costs and driving performance, positioning Oxy for long-term success. Our proprietary Oxy Drilling Dynamics technology is helping drive down costs by reducing drilling days, preventing tool failures and improving precision landing.

Partner of Choice®
Oxy is committed to operating responsibly; providing safe, healthy and secure workplaces; protecting the environment; maintaining high ethical standards; upholding and promoting human rights; benefiting our stakeholders; and respecting cultural norms and values, everywhere we operate.
