Oxy has a legacy of successful partnerships with the Abu Dhabi National Oil Company (ADNOC), including our 30-year joint venture in Al Hosn Gas, one of the largest Middle Eastern natural gas developments. Working with ADNOC, Oxy also has a 35-year concession for onshore Block 3, which covers approximately 1.5 million gross acres and is adjacent to Al Hosn Gas, and a 35-year concession to explore and develop onshore Block 5, which covers an area of approximately 1 million gross acres and is adjacent to onshore Block 3.
**Strong Safety Performance**
Oxy conducts business in a manner that protects the health and safety of people and the environment at our facilities. Our consistently strong safety performance reflects our employees’ dedication to creating and maintaining safe work environments.

**Low-Carbon Leadership**
With decades of experience in large-scale carbon dioxide (CO₂) transportation, use and storage for enhanced oil recovery, we are applying our carbon management expertise to advance low-carbon initiatives that we believe will sustainably enhance our business. Oxy is focused on decreasing our total carbon footprint and helping others achieve the same goal.

In 2023, Oxy and ADNOC announced a strategic collaboration to evaluate investment opportunities in Direct Air Capture plants and CO₂ sequestration hubs in the United States and the UAE as a pathway toward the development of carbon management platforms to accelerate the net-zero goals of both companies.

**Pathway to Net Zero**
Oxy’s climate goals are to achieve net-zero greenhouse gas (GHG) emissions in our operations and energy use before 2040, with an ambition to do so before 2035, and net-zero emissions from our total carbon inventory, including the use of our products, with an ambition to do so before 2050.

**Reducing GHG Emissions**
Efficient capture and use of natural gas are key elements of Oxy’s net-zero strategy. Oxy was the first U.S. oil and gas company to endorse the World Bank’s “Zero Routine Flaring by 2030” initiative. We were also the first major U.S. producer in the Permian Basin to join the Oil and Gas Methane Partnership 2.0, a Climate and Clean Air Coalition initiative led by the United Nations Environment Programme, as well as the Methane Guiding Principles.

**Partner of Choice®**
Oxy is committed to operating responsibly; providing safe, healthy and secure workplaces; protecting the environment; maintaining high ethical standards; upholding and promoting human rights; benefiting our stakeholders; and respecting cultural norms and values, everywhere we operate.

**Emirates Foundation**
Oxy was one of the first supporters of the Emirates Foundation when it was established in 2005. We are proud to support the Emirates Foundation in its efforts to identify and develop young Emirati talent in science, innovation, financial literacy and volunteering.

**Promoting STEM**
Oxy participates in the Emirates Foundation’s “Think Science Fair,” a platform for connecting science and engineering students with the business sector. Our employees have helped judge this STEM-focused event.

**Volunteering in the Community**
Oxy supports the Emirates Foundation’s “Takatof” program, which promotes volunteerism. Volunteers have made Iftar meals and distributed Ramadan kits provided by the Emirates Foundation to workers at the fishermen’s port area in Abu Dhabi.
